

BUGATA PRAVALLIKA

Full-Stack Developer • Generative AI Engineer • NLP & Automation Enthusiast

✉ pravallikabugata@gmail.com ☎ +91-8712127297 [GitHub](#) [LinkedIn](#)

PROFILE

Full-stack developer and Generative AI enthusiast with hands-on experience building AI-powered applications, automation workflows, responsive web interfaces, and NLP-based systems. Skilled in React.js, Tailwind CSS, LLM-driven chatbots, AI agents, and scalable Python backends. Passionate about RAG systems, multi-agent AI, and real-world automation.

EDUCATION

B.Tech – Computer Science & Engineering | RGUKT Nuzvid | Expected 2027 | CGPA: 8.40 / 10

Pre-University Course (PUC) | RGUKT Nuzvid | CGPA: 9.52 / 10

SSC | Amarajyothi School | GPA: 10.0 / 10

TECHNICAL SKILLS

Web Technologies: HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Design, Cross-Browser Compatibility

Frontend: React.js, Vite, Tailwind CSS, Component-Based Architecture

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, Supabase

Generative AI & LLMs: Prompt Engineering, LLM App Dev, Google Gemini API, RAG Systems, AI Agents, Conversational AI

AI Frameworks: LangChain (learning), CrewAI, Multi-Agent Systems

Machine Learning: Scikit-Learn, TensorFlow, Keras, Pandas, NumPy, RandomForest, GradientBoosting, Feature Engineering

NLP: Sentiment Analysis, Text Classification, Stance Detection, Zero-Shot NLP Pipelines

Automation & Tools: n8n, Webhook Integration, Git, GitHub, VS Code, Postman, Cloudinary, WordPress

Languages: Python, JavaScript, TypeScript, Java, C

PROJECTS

EduReach Platform | *React.js, TypeScript, Node.js, Express.js, Tailwind CSS, LLM APIs, JWT, Cloudinary*

- ▶ Built a full-stack college portal with 15+ reusable React.js + TypeScript UI components and a Node.js/Express.js backend for courses, admissions, placements, and fees.
- ▶ Integrated an AI-powered chatbot with LLM APIs and an AI Agent for autonomous, context-aware query routing. Implemented JWT auth with RBAC, token refresh, and Cloudinary media management.

Career Compass – Career Guidance Platform | *MongoDB, Express.js, React.js, Node.js (MERN Stack)*

🔗 Live: <https://my-career-compass-website.onrender.com/>

- ▶ Full-stack MERN career guidance website with personalized career paths, competitive exam details, and exploration of 500+ Indian colleges with search filters and user authentication.
- ▶ Clean responsive UI deployed live on Render, helping students discover programs based on scores, location, and interests.

QuantStock – AI-Powered Market Forecasting Dashboard | *React.js, FastAPI, Scikit-Learn, NumPy, yfinance API, Python*

- ▶ Full-stack AI financial dashboard with ensemble ML models (RandomForestRegressor, GradientBoostingRegressor), sliding window feature engineering, and live Yahoo Finance API integration.

Traffic Violation Reporting Portal | *Node.js, Express.js, HTML5, CSS3, JavaScript, REST APIs*

🔗 Live: <https://traffix-violation-portal.onrender.com>

- ▶ Civic complaint portal with complaint submission, real-time status tracking, and admin dashboards — fully responsive and deployed live.

AI News Summarizer Automation Pipeline | *n8n, Google Gemini API, LangChain, RSS Feeds*

- ▶ Automated GenAI pipeline collecting news from RSS feeds, generating structured summaries via Google Gemini, with full n8n workflow automation and LangChain for multi-step LLM orchestration.

AI Podcast Generator Automation Pipeline | *n8n, LLMs, Google Chat Model, Webhooks*

🔗 Live: <https://whisper-studio-lit.lovable.app>

- ▶ End-to-end automated podcast generation system ingesting topic prompts via webhooks and producing complete scripts with Google Chat Model.

ADDITIONAL PROJECTS

Student Result Management System with Academic Intelligence

React.js, FastAPI, PostgreSQL, Scikit-Learn, Python

- ▶ Full-stack academic analytics platform with RBAC (JWT), Python FastAPI REST APIs for result CRUD, ML-driven predictions, and automated analytics reports.

Multi-Agent AI System for Zero-Shot Stance Detection

Python, CrewAI, NLP, LLMs, Prompt Engineering

- ▶ Multi-agent CrewAI system detecting tweet stance (favor / against / neutral) via zero-shot NLP — three agents: Linguistic Analysis, Sentiment Detection, and Reasoning & Classification.

Smart Farmer Assistance System

- ▶ ML platform with CNN-based crop disease detection from leaf images and weather API-driven agricultural recommendations.

CERTIFICATIONS

- ▶ NPTEL – Artificial Intelligence
- ▶ NPTEL – Cloud Computing
- ▶ NPTEL – Deep Learning
- ▶ NPTEL – UML (Unified Modeling Language)
- ▶ Fundamentals of Algorithms – QIC
- ▶ Exploring Quantum Computing Workshop

ACHIEVEMENTS & LEADERSHIP

- ▶ SRM GeeksforGeeks Hackathon – Participant
- ▶ NCC B Certificate – Grade A
- ▶ NCC C Certificate – Grade B

LANGUAGES

Telugu | English | Hindi
